ASTM A350 LF2 Carbon Steel Forged Fittings and Valves are primarily for low-temperature service and requiring notch toughness testing. They are manufactured to corresponding ASME or API dimensional standards. The forgings may be made from ingots, blooms, billets, slabs or bars through hot-forging process.

Steel Valve Material Low Temperature ..

The A350 LF2 material is often referred to as Low Temp Carbon Steel Fittings or Flanges. A350 LF2 is a carbon steel fitting material, very similar to A105, that is used in general industrial applications and can withstand continuous service down to -46F. This material is supplied in a normalized condition
