Oracle Siebel Open Ui Developers
Siebel Open UI uses objects to deploy each element that it displays in the client. You can customize each of these objects in a way that is similar to how you customize each object in a high-interactivity client. You can customize each object separately. Each object resides in a layer that implements a particular area of customization.

The Siebel View is further shortchanged, by being deprived of any real identification on the Client. This design is a legacy of pre Open UI Siebel. This was not a problem earlier, because before Siebel Open UI, there was never any thought of allowing the addition of any custom content pane to the Siebel Screen, outside the Main View.
