You also have access to numerous screensavers for free. The categories are simple and the layout is straightforward, so it is a much easier platform to navigate.

Orthodontic Biomechanics Treatment Of Complex

A malocclusion is a misalignment or incorrect relation between the teeth of the two dental arches when they approach each other as the jaws close. The term was coined by Edward Angle, the "father of modern orthodontics", as a derivative of occlusion.This refers to the manner in which opposing teeth meet (mal+ occlusion = "incorrect occlusion").The malocclusion classification is based on the ...

Beam Hardening. An x-ray beam is composed of individual photons with a range of energies. As the beam passes through an object, it becomes "harder," that is to say its mean energy increases, because the lower-energy photons are absorbed more rapidly than the higher-energy photons (. Fig 1).Two types of artifact can result from this effect: so-called cupping artifacts and the appearance of ...
