The Prostate Cancer Revolution Beating Prostate Cancer

...

Prostate cancer is one of the most common types of cancer that develops in men and is the second leading cause of cancer deaths in American men, behind lung cancer and just ahead of colorectal cancer. The prognosis for prostate cancer, as with any cancer, depends on how advanced the cancer has become, according to established stage designations.. The prostate gland is a walnut-sized gland ...

times a month) had about a 20% lower chance of prostate cancer, compared with those who did it less (4 to 7 times a month). That was...

Does Ejaculation Cause or Prevent Prostate Cancer?

Once prostate cancer has spread beyond the prostate, survival rates fall. For men with distant spread (metastasis) of prostate cancer, about one-third will survive for five years after diagnosis.

Prostate Cancer Survival Rates: What They Mean

Prostate cancer that spreads to the bones can cause pain and broken bones. Once prostate cancer has spread to other areas of the body, it may still respond to treatment and may be controlled, but it's unlikely to be cured. Incontinence. Both prostate cancer and its treatment can cause urinary incontinence.
